

Mustang Roundup

On April 8th, the Mustang Club of St. Louis held their annual "Mustang Roundup". Although the event was originally to be all Mustangs, our club was invited to bring any of our Ford products and that we did. The day started a little on the cool side but temps rose into the mid-seventies which made for a great day. Anxious to start the show season, our club turnout for this event is always good, even on those years when mother nature was still hanging onto winter.

We had 27 of our club cars and trucks and about 35 members and family. It was great to see new member, Rich and Coleen Chatfield active with their red '88 Mustang convertible. Although fighting some serious health problems Ed Mauzy, along with Julie, was in attendance with their Raptor. It was great to see Ed back in limited action.

As the afternoon came, some of our members were off to other events and cruises to take advantage of the great April weather. We thank all of those who represented our club that day.
